## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,3,6,10,11,13,19,21 and 22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of US Patent 7,131,272. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the current application are broader in scope than the claims in the other application. The claims in the patent contain all the limitations of the current claims with the addition of a stand alone cooler to precool the air. The other claims will dominate the currently pending claims (one cannot perform the other claims without performing the current claims). It is considered obvious to an ordinary practitioner in the art that the method and apparatus of applicants' '212 application could be performed without the stand alone cooler, as long

as one does not need the added performance derived therefrom. A terminal disclaimer was filed by applicant 5-8-2006, to overcome the same reference in a provisional double patenting rejection. Although the terminal disclaimer would have overcome the rejection, even if the other application becomes a patent, a typographical error was made and was not earlier detected. Although the earlier terminal disclaimer was approved by the office, it should not have been. The application being overcome, should have read 10/674,212. Instead, the instant application's serial number (10/674,022) was inserted. If applicant resubmits the earlier terminal disclaimer, with the serial number corrected in the body of the disclaimer, all claims will be allowable, and the case will be so processed.

***Allowable Subject Matter***

Claims 2,4,5,7,9,12,14-18 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
